

FROM THE PERSPECTIVE OF THE SYSTEM EMPLOYEE: HOW FINANCES IN THE HEALTH CARE SYSTEM ARE WASTED. FIRST PART – DIAGNOSIS

Abstract

The article concerns the financial aspects of the Polish health care system. It presents the sources of its financing as well as its legal aspects, it also mentions health care patterns from other countries. The authors focus on the biggest areas of financial mismanagement in the health care, such as inadequate allocation of funds and faulty functioning of the health insurance system. The article refers also to the current health crisis connected with the COVID-19 pandemic.

Keywords: finances, health care, insurance policy, medical benefits.
