The Impact of Migration on the Level of Public Security in United States

Abstract:

The purpose of this article was to explore the impact of migration on the level of public safety in United States as an example of a country consisting close entirely of immigrants or their scions. The case study of selected national groups, along with historical analysis of their presence on the North American continent, indicates the main areas of occurrence and characteristics of criminal activities. An analysis of the American migration law has been made since the beginning of this state. A methodology was used to analyze sources and secondary data from national security institutions of United States and periodic censuses.

Keywords: United States, migration, security, immigrants.
