SPECIALISATION: ACCOUNTING AND FINANCE ACCA

A student gets acquainted with an accounting system, standards and regulations, he/she studies the specifics of financial accounting, management accounting, bank and insurance accounting. He/she becomes a specialist in financial reporting, as well as financial reports' analysis, acquires knowledge on tax management in a company, and on the pre-requisites of starting a new company. All the information and skills are further improved during classes on financial markets, international finance and corporate finance, comprising issues related to financial events, sources of funding, appropriate use of equity and debt in order to achieve strategic goals in business, which lead to success, an increase in value, and a competitive position. The achievement of this goal requires learning financial risk assessment, evaluation of investment and financial effectiveness in the changing uncertain and unstable environment. It also requires a multi-disciplinary knowledge gained at various major courses, which lead to career as an accounting specialist. The syllabuses are prepared and examinations performed for the indicated 8 courses, according to the recognised ACCA (The Association of Chartered Certified Accountants) certificate. The University's graduates are exempt from taking examinations on courses accredited by ACCA and taken during their studies.

LIST OF COURSES

- Audit and assurance,
- International accounting standards,
- Analysis of financial reports F7,
- Financial reporting F7,
- VAT in accounting and VAT Settlements F6,
- Tax accounting F6.

The ACCA certificate helps students to obtain an internationally recognised accounting accreditation, enabling employment beyond Polish borders, in responsible positions in accounting departments. The certified accountants with ACCA certificate are sought by companies, big international corporates, in internal and external audit and consulting firms.

CAREER AFTER STUDIES:
